Client Opportunity
Higher = better
Actionable upside, with measurement before expansion.
Confidence C

THE READ

Vintage is publicly competitive, but Morton is not open territory. Specialty breadth, online booking and independent contact-lens authority support a 72 Practice Competitiveness score. Nearby routine and specialty alternatives hold Room to Win at 44. The best first move is to prove which existing specialty pathway converts before adding services, hours or broad promotion. Your Competition

Direct peers first | Tier 2 omitted for clarity

Focus On Eyes

Morton tenure, broad care and Saturday hours create a strong routine-access alternative. [E021](#) [E022](#)

Vision Care Center

Washington specialty overlap includes advanced dry-eye diagnostics and multiple myopia options. [E024](#) [E025](#)

Tri-County Eye Center

Regional specialty visibility includes a Dry Eye Clinic and Center for Macular Health. [E023](#)

Directional finding: straight-line bands suggest meaningful nearby and regional choice, but they are not drive times or patient-choice counts. [E037](#)

Your Opportunity

Opportunity scores | Higher = better

Specialty conversion system

Measure the existing service pathways before adding another offer. [E002](#) [E003](#)

76

Specialty contacts

Specific capability plus independent professional authority. [E004](#) [E010](#)

72

Dry eye

Specific modalities meet an older population, with visible peer overlap. [E002](#) [E024](#)

68

Myopia

Four approaches meet a sizable youth segment, with regional overlap. [E003](#) [E025](#)

First 30 Days

Working hypotheses | Test before change

H1 WORKING HYPOTHESIS

Baseline one specialty funnel. Proof: weekly counts from qualified inquiry to start reveal a drop-off or none. Stop: do not expand if conversion and capacity already meet Vintage-set thresholds.

H2 WORKING HYPOTHESIS

Run an access diagnostic. Proof: aggregate calls show a recurring loss cluster by hour or service. Stop: keep current hours and staffing if no meaningful pattern appears. [E020](#)

H3 WORKING HYPOTHESIS

Audit one trust loop and address consistency. Proof: one end-to-end baseline plus corrected editable listings. Stop: no new campaign if both are already healthy. [E031](#) [E032](#)

Turn the public read into a four-week proof.

Provide one de-identified aggregate specialty funnel plus one de-identified aggregate call/access export. No patient-level fields.
