

Where Vintage Optical can win its next patient dollar, and what must be measured first.

Vintage Optical | Morton, Illinois | Public-only directional evidence | Evidence reviewed 2026-07-30

54

/ 100

MEASURE FIRST

Client Opportunity Score

Directional public-only evidence, not a grade or revenue projection.

★ THE READ

Market support is real. Proof is the bottleneck. Pressure remains meaningful. Vintage leads review volume only in a bounded same-page Google sample. The next move is three measured tests, not broad spend.

1

YOUR MARKET

Modeled catchments show demand support. Observed local growth adds context, not a forecast.

173,058

AT 20 MINUTES

Modeled population catchment, not patient count.

283,661

AT 30 MINUTES

Modeled population catchment, not patient count.

+2.29%

OBSERVED POPULATION

2020 to 2025 village change. Not a forecast.

Market Demand-Supply

61 / 100

Higher = better for the client

+3.92%

OBSERVED ENROLLMENT

2022-23 to 2025-26 district change. Not a forecast.

Catchments are modeled drive-time areas and routes omit live traffic. Growth is observed, non-forecast context.

2

YOUR COMPETITION

The market is close and visible. Patient choice is still unproven.

Competitive Pressure 57 / 100 Room to Win 43 / 100

Higher = more pressure

Higher = better

Room to Win = 100 - 57 = 43. Exact inverse of approved pressure.

Practice Competitiveness 61 / 100 Client Opportunity 54 / 100

Higher = stronger

Higher = better, directional only

SOURCE-SEPARATED GOOGLE ROWS | BOUNDED SAME-PAGE SAMPLE

Walmart

Walmart 3.5 / 8

The wedge: Vintage leads review volume in this bounded same-page Google sample. It does not establish canonical share, complete competitors, patient choice, or cross-platform totals.

3

YOUR OPPORTUNITY

Four proof-to-unlock growth tests, ranked by what to measure first.

1 Visibility baseline

Measure local query visibility before changing spend.

READY TO BASELINE

Digital Presence 60 / 100

Proof to unlock
Rank grid

2 Reputation source control

Anchor each platform to source-specific review evidence.

BOUNDED EVIDENCE

Source-specific

Proof to unlock
Source-specific baseline

3 Booking completion

Measure completion before diagnosing funnel friction.

NEEDS DENOMINATOR

Practice Competitiveness 61 / 100

Proof to unlock
Funnel denominator

4 Specialty evidence

Dry eye 53 Myopia management 53
Specialty contact lenses 51

RESEARCH FIRST

Directional lane scores

Proof to unlock
Authorized economics

Score direction: Digital Presence and Practice Competitiveness are higher = stronger; specialty lane scores are higher = stronger evidence. No demand, capacity, ownership, economics, or service-line upside is assumed.
Decision rule: authorize one focused fix only when a repeatable gap, owner, capacity, and denominator are proven. Otherwise stop.

FIRST
30
DAYS

01 Baseline visibility

Owner: Marketing lead
Proof: Approved query set and geographic rank-grid export.
Cadence: Baseline, then monthly. Act on repeatable gaps.
Kill: Stop if geography or entity matching cannot be reproduced.

02 Control reputation source

Owner: Practice manager
Proof: Platform-specific count, recency, and response baseline.
Cadence: Reconcile monthly. Choose one measured workflow.
Kill: Stop cross-platform totals without dedupe.

03 Measure booking completion

Owner: Operations owner
Proof: Non-PHI funnel numerator and final denominator.
Cadence: Weekly for 30 days. Fix the highest verified drop-off.
Kill: Stop if capacity or ownership is unavailable.

Approve the 30-day measurement sprint

Return with rank-grid visibility, source-controlled reputation, and a complete booking denominator.
